Vivid AI ™

POWERED BY RECYCLEYE

Ground-Breaking Technology

VIVID AI is a powerful sortation machine, detecting and sorting more classes of material than ever. Combining Recycleye AI and MSS system capabilities, VIVID AI handles material classifications not previously possible.

Pair the right detection method with the right extraction method!

Vivid Air ™

Combines the powerful Recycleye AI vision with the field-proven MSS air ejection system to sort material at the highest volumes without restrictions on picks/minute.

Vivid Bot ™

Robotic extraction solution for tight retrofit sand multiple separate sort categories sorting applications.

Vivid Vision ™

Take full advantage of the AI's powerful statistics and data monitoring tools.

Vivid AI™

POWERED BY RECYCLEYE

Applications

- Aluminum QC: UBCs from Non-UBC aluminum and non-metals
- PET QC: Bottles from thermo-forms and non-PET
- HDPE QC: Natural from Color PE and non-PE
- Last Chance: Recyclables from residue
- Black Plastics from mixed recyclables
- Food-grade from non-food-grade polymers

Specifications and Features

- Machine width: 24" - 96" in 8" increments
- Electricity: 5-12HP
- Compressed Air: Depending on application
- Single-eject and dual-eject configurations
- Metal detector upgrade available
- New complete or retrofits
